

World Class Lawns, Inc.

ZIKA VIRUS ALERT

In the light of the recent concerns regarding the Zika Virus and its connection to mosquitos. We want to remind you of our Tick Spray Program which **also** controls mosquitos.

While the normal service area for our Tick Spray Program is basically the back yard and woods, we have the ability to **enhance/increase** the applications to cover the entire lawn including pool and patio areas.

Please feel free to call us for more details on this program or on how to begin including your entire lawn, if you currently have this service, or want to increase your protection from possible Zika Virus mosquito infection.

All of our employees are licensed by the state of N.J. and trained in the application of "Pest Sprays"
